

## Certifications and Integral Management

Industrias FERRI has implemented an Integrated Management System for Quality, Environment, and Occupational Health and Safety, certified according to ISO 9001, ISO 14001, and ISO 45001 standards. It is also certified by IASME under the Cyber Essentials scheme.

This management system is supported by our organizational structure and specific procedures designed to ensure effectiveness and efficiency in all activities, with a focus on quality, environmental responsibility, and occupational risk prevention. It applies to the design, manufacturing, and sale of machinery and equipment for the industrial, naval, and quarry sectors, as well as inspection and repair services.

By focusing on the needs of both our current and potential markets, our system complies with the general guidelines of the PECAL 2110 Standard and the NIS2 Directive, for which we are currently in the process of certification.

Furthermore, for over 20 years, Industrias FERRI has been listed in the Directorate General of Armament and Material (DGAM) registry as a supplier of products and services, with Registration Number: 6043 (NAVAL).

Additionally, the products and services we provide often require specific certifications. Therefore, in addition to our Management System certifications, we hold product and service accreditations, including the following:

- **Davits, winches, and hooks for rescue boats and rafts:** Approved under the Marine Equipment Directive (MED) 2014/90 and its UK equivalent, MER, for various models and series.
- **Marine Classification Society Certifications (BV, LR, DNV, RINA, ABS):** Granted individually for each specific piece of equipment, ensuring compliance with the Classification Society requirements for the target vessel.
- **Accreditations from various flag states and specific manufacturers (Henricksen, Narwhal, etc.):** Authorized by the Directorate General of Merchant Marine to perform inspections and homologation of davits and boats.
