

YOUR PARTNER FOR WORKING AT SEA

HOW DO YOU NEED IT? WE CAN MAKE IT

SOLUTIONS TO ALL TYPES OF NEEDS.

A good job starts in the first minute with the initial conversations. And this exigency is maintained in each and every decision taken and in every task developed.

Side by side with the client we carry out the most ambitious projects imaginable. We face the project as an integral whole based on a method which, beyond the demands of the certification societies, is based on our experience in resolving problems, continuous improvement and, in short, on seeking our client's satisfaction.

ADAPTATION AND DEVELOPMENT OF CUSTOM MACHINERY:
THE NIS METHOD.

NEED-IDEA-SOLUTION

OUR HISTORY REVITALIZES OUR PRESENT

Industrias FERRI S.A., was founded in 1964 by Ricardo Fernández Villar, naval engineer and deep-sea skipper. After serving for years on fishing boats, he transferred his experience to manufacturing deck equipment.

Throughout these 50 years, we at FERRI have specialized in making equipment for all types of vessels, complying with the most rigorous requirements of performance and reliability, confirming our fame as an innovative manufacturer of high quality products.

Two aspects define our outlook: FLEXIBILITY and RIGOUR. So as to contribute MADE-TO-MEASURE SOLUTIONS for the varied challenging needs of our clients. Our specialized products are complemented by a range of standard products.

Our founder's firm policy has become our daily watchword: "We must be proud of our work."

Our accumulated experience along with our clients has allowed us to grow, and to improve our equipment. This is only a part of the sum of our activity which is backed up by the technical support we offer with each project: post-sales service, maintenance, inspection, and testing.

A FULL SET OF INTEGRATED SERVICES OFFERED
24/7 AND WORLDWIDE

OUR OWN DEPARTMENT OF AUTOMATION, SOFTWARE, ELECTRONICS, DRIVES,... FERRI SYSTEMS

SERVICES

FERRI offer our customers a comprehensive service throughout the equipment's working life: after sell maintenance, modifications and spare parts.

We plan preventative maintenance so as to prolong the equipment's life, always in close collaboration with our clients and suppliers, as well as to assist with the necessary documentation and certifications by maritime legislation.

We have qualified and experienced technicians 24/7, 365 days a year before, during and after delivery and a worldwide network of service stations for technical support. We adapt our services to your needs.

FERRI is motivated and committed to resolve any challenge and offer its clients the best life-cycle management programs.

TRACEABILITY, QUALITY, ENGINEERING, NORMATIVE

Our internal processes allow us to follow up from the design to the set-up of the equipment with a comprehensive servicing throughout its working life: draft, design, manufacture, testing, installation, certification, commissioning, start up, after sell maintenance, modifications, updates, periodic testing, etc. This traceability is a guarantee for our customers.

All systems comply with SOLAS international regulations.

We offer inspection for hours and other manufactures of Spanish flags and others as per: **ILO 152 agreement, Work International Organization**

Ferri performs annual and 5 years inspections on lifting appliances, loose gear and wire rope. Likewise accommodation ladders and gangways according to current regulations, as well as any other overload test on any element on board.
