DEVELOPING SOLUTIONS BASED ON YOUR IDEAS
AND NEEDS IS BOTH OUR GREATEST CHALLENGE
AND OUR PRIMARY MOTIVATION.

OUR HISTORY REVITALIZES OUR FUTURE

Founded in 1964, INDUSTRIAS FERRI S.A. is a family-run business with over 60 years' experience and proven reliability.

We work closely with our clients to understand your requirements and ideas, exploring solutions that are both technical and cost-effective, to deliver the equipment and services that best meet not only your needs but also your high expectations.

Our focus is on achieving the highest quality and our founder's strict policy has become our watchword:

"We must be proud of our work"

OUR VISION

- Sustainable development requires specialized machinery and technical services that can responsibly and efficiently take on the diversity of contemporary technical challenges.
- Technical advances and the optimization of resources require experts who are able to comprehend the client's specific needs and problems in order to develop customized equipment and services that will satisfy the client's every demand.
- With total respect for the environment , INDUSTRIAS FERRI will continue to contribute improvements and innovation to the development of machinery and services.
- Our vision is focused on the absolute satisfaction of our clients and our team.

OUR MISSION

- We work to deliver equipment and services which we custom develop to resolve our clients' specific needs.
- We tackle successfully and with economic solvency the development of projects which are delivered on time, according to specification and within budget.
- We take on projects which we can be proud of and that earn our clients' recognition.
- In all our activities, we defend our business solidity, seriousness, and efficiency.
- We keep the highest standards of industrial, labor, commercial, and environmental ethics and responsibility. We aim to fulfil our responsibility to society.
- We improve by applying our knowledge and experience to all our products.

SERVICE

Foreseeing maintenance requirements is essential for any product. We account for these requirements right from the concept design. We take everything in account, from operator personnel capacity, to the use of tried-and-tested components that are available worldwide. Added to this, we provide service and support before, during, and after delivery, 24/7, in any part of the world, and we have trained and qualified technicians ready to sail at any time. Our service cover all the drives and controls of our machinery.

We can therefore guarantee the reliability of our designs and years of trouble-free operation.

QUALITY

We design, manufacture, test, and service in compliance with any classification society.

We operate responsibly with the environment; creating methods and habits which foster recycling and energy efficiency.

Since 2007, we have presented our corporate responsibility plan and achieved certification in environmental management.

We are certified ISO9001, ISO14001, ISO45001, and Cybersecurity.

MAKING THE DIFFICULT EASY

We innovate by combining technologies: electronic, hydraulic, pneumatic, mechanical, electrical, and information technologies - always acting in collaboration with our clients and suppliers.

Our systems are easily installed and maintained, thereby reducing costs and speeding up integration.

We design, manufacture and service, all the drives and controls of our machinery, electronic, electrical, hydraulic, pneumatic,... with the company group FERRI Systems.

MEGAYACHTS

A good job starts in the first minute, with the initial conversations. We maintain this standard in each and every decision we make and for every task we undertake.

For the ship designer, shipyard, and owner, the advantage of working with Ferri is that faced with any request or need, Ferri will calculate, design and offer the proper equipment to meet all your requirements, and every relevant rule and regulation.

This allows greater freedom, both in the ship's design and in the potential performance and capabilities of the equipment.

SOLUTIONS FOR ALL NEEDS

Our speciality is the development of specific, unique, equipment to meet technically complex needs, often based on little more than an idea.

Side by side with the client, we undertake the most ambitious projects imaginable.

We approach each project holistically. By drawing on our knowledge, experience, technology, and innovation we develop the appropriate solutions.

CUSTOM FINISHES

No matter how complex, we are experienced in coordinating with other companies throughout the development of a project. Such coordination can be critical for megayacht elements, especially when it comes to the final finishes: from the choice of paint, to the use of very specific materials such as fine woods, synthetic fibers, special alloys, stainless steel, mirror polished steel, and more.

ANCHOR & MOORING

Capstans and anchor windlasses with chain stoppers.

- Integrated and compact design.
- Design integration which can be adapted as needed.
- Below deck systems.
- Low noise level and vibration.
- Stainless steel / Polished finishes.

SCIENTIFIC WINCHES

We also design and manufacture a full of made-to-measure winches: Scientific, oceanographic, umbilical and ROV for Megayacht.

SPECIALIZED MACHINERY

LARS

Launch and recovery systems, whether cranes, davits, transversal booms,... For the launch and recovery of boats, tenders, limousines, rescue crafts, submarines...

Equipment that is adapted to each specific project, working loads, the required sea state, vessel shape, available space, and so on.

SPECIALIZED MACHINERY

LARS for Submarine

HODOR - SHADOW VESSEL (Armon Shipyard)

Raised with hydraulic cylinders, this system has two telescopic arms designed for the launch and recovery of a submarine of 9t on both sides of the vessel.

Certified by Lloyds Register of Shipping, it is also MED certified, for launching and recovering a rescue boat.

OTHER FERRI EQUIPMENT INSTALLED:

Stern lift for speed boats, foldable telescopic cranes, windlasses, chain stoppers, and capstans.

SPECIALIZED MACHINERY

LARS for Tender Boat

WAYFINDER – SHADOW VESSEL (Armon Shipyard)

This equipment is designed for the launch and recovery of a limo boat of 10t.

OTHER FERRI EQUIPMENT INSTALLED:

Telescopic davit for jet skis, windlasses, chain stoppers, and HPU.

SPECIALIZED MACHINERY

LARS for Tender Boat

NEBULA - SHADOW VESSEL (Armon Shipyard)

This equipment is designed for the launch and recovery of a limo boat of 12t.

OTHER FERRI EQUIPMENT INSTALLED:

LARS for a rescue boat on the main deck, telescopic davit for jet skis, windlasses, chain stoppers, capstans, and HPU.

RENAISSANCE (Freire Shipyard)

This equipment is designed for the launch and recovery of a limo boat of 12t.

OTHER FERRI EQUIPMENT INSTALLED:

Two telescopic davits for lifeboats/rescue boats, telescopic davit for jet skis, and telescopic davit for life rafts.

SPECIALIZED MACHINERY

LARS for Submarine & Tender Boat

Naia (Freire Shipyard)

This equipment is designed for the launch and recovery of a submarine of 14t.

It launches and recoveries port and starboard the submarine, limos and jet skis.

OUR SPECIALITY IS THE DEVELOPMENT OF SPECIFIC, UNIQUE,
EQUIPMENT TO MEET TECHNICALLY COMPLEX NEEDS,
OFTEN BASED ON LITTLE MORE THAN AN IDEA.

SPECIALIZED MACHINERY

ACCESS SYSTEMS

We can supply foldable ladder systems, and their platforms, for installation behind the side door. These systems save valuable space and come with fully automated operation.

FERRI equipment has been installed in vessels for luxury cruise lines from Chantiers de l'Atlantique, the Mariotti Shipyard, the Royal Navy, the Royal Australian Navy, the Spanish Navy (Armada), the German Navy and others.

TRAINING SHIP OF THE PERUVIAN NAVY

SPECIALIZED MACHINERY

CRANES

FERRI can supply cranes for a wide range of applications and operational conditions as SOLAS, MED, LSA, MCA, ROV, Submeribles, Boats, Man Ridding and more. Crucial for efficient work onboard, these can range from units that require great versatility, to units with highly specific functions. We develop cranes according to any specification, adapted to any vessel, use, working conditions, and certification.

DAMEN Shipyards

DAMEN Shipyards

Luxury Cruise Lines

HODOR
Deck crane
SOLAS davit

SPECIALIZED MACHINERY

ELEVATOR BOAT LIFT

We provide premium lifts that can be adapted to any kind of vessel, to launch and recover any element.

GARAGE & SHELL DOORS

We manufacture high-quality doors. Our doors are custom – made - designed and engineered to meet your every need.

DAVITS

We provide davits for rescue boats, lifeboats, liferafts, load handling, and more...
All shapes and technical requirements for: SOLAS, combined use, etc.
Bespoke davits for any kind of Megayacht

MBHS MISSION BAY HANDLING SYSTEM

Load handling equipment for garages, hangars, multimissions bay, etc.
With the capacity of launch and recovery vessel to shore functions.
For use with containers, tenders, limos, submarines, speedboats, and more.

CUSTOMIZED LOAD HANDLING SYSTEM

CRANES FOR LOAD HANDLING BETWEEN DECKS AND LABORATORIES.

DISCOVERY. Oceaographic Research Vessel.

MODULARIZATION

Machinery fitted on customized, modular solutions.

ELECTRICAL, ELECTRONIC, ENGINEERING AND PRODUCTS

FERRI Systems works in all fields of electrical engineering and automation, from the design of electrical plants (electrical diagrams, load flow studies, short-circuit currents, and protection), to the manufacture of all types of electrical panels, consoles, switchboards, both for power distribution and for the control and operation of machinery.

We have the latest tools for electrical design (EPLAN, ETAP...), and work with the best brands (ABB, SIEMENS, SCHNEIDER...). In the area of automation, we can program PLCs of all models and integrate them in multiplatform and web environments.

Industrias FERRI S.A. is based in an industrial environment with access to one of Spain's most important sea ports, Vigo.
